

# JUSTIN HENRY

Frontend Engineer · UI & Interaction Systems · React / Next.js / TypeScript

Clifton, NJ · [justin.henry0024@gmail.com](mailto:justin.henry0024@gmail.com) · [\[portfolio\]](#) · [github.com/massiah024](https://github.com/massiah024) · [linkedin.com/in/massiah024](https://linkedin.com/in/massiah024)

## SUMMARY

Frontend-focused developer building polished, interaction-driven web products with React, Next.js, TypeScript, and modern frontend tooling. Background in sales, operations, and business development informs a product-oriented approach to UI systems, UX flow, and customer-facing experiences.

## SKILLS

### FRONTEND

React · Next.js · TypeScript · JavaScript (ES6+)  
Tailwind CSS · Sass · Framer Motion · Redux  
HTML5 · CSS3 · Vite

### BACKEND / DATA

Node.js · Prisma · MongoDB  
PostgreSQL (Neon) · Firebase  
REST APIs · NextAuth · Clerk

### TOOLS & PLATFORMS

Git · GitHub · Vercel  
Stripe · Figma · Notion  
VS Code

## EXPERIENCE

### Frontend Engineer & Digital Brand Systems Lead

Mar 2025 – Present

Litty Co. — Remote, Contract

- Leading frontend development and digital identity systems across a multi-brand ecosystem spanning e-commerce, service, and lifestyle-focused brands (JJ's Pro Service, JJ Totes, Great Wall of Legends)
- Building and maintaining responsive web experiences, component systems, branding assets, and content infrastructure across multiple concurrent projects
- Responsible for end-to-end implementation: UI architecture, brand consistency, site performance, and social presence across all three properties
- Working directly with ownership in an ongoing remote contract capacity — handling both technical execution and digital positioning for each brand

### Operations Manager & Contract Partner

2022 – 2025

JJ's Pro Service — NJ / Remote

- Managed daily operations, client relationships, and field coordination across active service contracts
- Expanded into brand marketing, business development, and digital presence work as the company scaled
- Transitioned into frontend development, directly applying operational and customer-behavior experience to product and UX decisions

### Solar Sales Consultant

2016 – 2022

Momentum Solar · Solar Xchange — NJ / FL

- Full consultative residential solar sales cycle — prospecting, site assessments, financing, and close — across competitive NJ and FL markets
- Built long-term client relationships in high-volume door-to-door and referral environments; developed strong instincts for persuasion, objection handling, and reading behavior — directly applicable to conversion-oriented UI and UX work

### Branch Manager

2014 – 2016

Penske Truck Leasing — Passaic, NJ

- Managed branch operations — team oversight, customer service, fleet coordination, and account management for a commercial leasing location

## PROJECTS

### GoCart — Full-Stack E-Commerce Platform

[Live](#) · [GitHub](#)

*Next.js · React · TypeScript · Tailwind CSS · Redux · Prisma · MongoDB · Stripe · NextAuth*

- Built a dual-role e-commerce platform with fully separate buyer and seller experiences inside a single Next.js application — role-aware routing, protected dashboards, and shared order state consistent across both contexts
- Seller portal includes a live earnings dashboard, bulk order status management, product listings with dynamic pricing and promotional campaign tooling, and a coupon system surfaced directly in the buyer's cart

- Integrated Stripe checkout alongside COD payment flows, session-based auth via NextAuth, address management, and a real-time cart with discount application and payment summary

### Glitter — Original Social Media Platform

[Live](#) · [GitHub](#)

*Next.js · React · TypeScript · Tailwind CSS · Prisma · PostgreSQL · NextAuth · OpenAI API*

- Designed and built an original social platform with a home feed, private messaging, notifications, and an integrated AI assistant — all rendered in an account-aware three-panel layout with real-time unread sync across routes
- Built Dee-EM — a full private messaging system with conversation list, threaded view, and live unread badge; engineered Brok, a context-aware AI assistant with natural language handling and language-switching capability
- Implemented account-aware UI behavior throughout — route protection, role-scoped views, and session-consistent state from login through all interaction surfaces

### Big Boy Portfolio — Frontend Product System

[Live](#) · [GitHub](#)

*React · Vite · TypeScript · Tailwind CSS · Framer Motion · Sass*

- Built a portfolio platform structured as a product experience — routed case study pages, reusable animation systems, productized service tiers with defined scope and copy, and inquiry flows designed for conversion
- Implemented interactive skill visualization, intentional dark/light mode across all states, and motion systems built for performance and visual coherence throughout

### Holy Grails React — Frontend Architecture Conversion

[GitHub](#)

*React · TypeScript · Tailwind CSS · Vite · Redux*

- Rebuilt a vanilla JS storefront into a scalable React component architecture — reusable UI patterns, typed props, route-aware interactions, and shared cart state managed cleanly across views
- Preserved full visual fidelity from the original while modernizing the underlying structure for maintainability and long-term extensibility

### Netflix Clone — Streaming UI & Interaction Systems

[Live](#) · [GitHub](#)

*React · Next.js · TypeScript · Tailwind CSS · Firebase · TMDB API · NextAuth*

- Reproduced core Netflix UI with careful attention to interaction pacing — autoplay systems, visibility-aware state handling, route-coordinated transitions, and hover behavior consistent with the reference product
- Integrated TMDB API for live content data, auth-aware routing via NextAuth and Firebase, and embedded custom branding inside the video player preview

## EDUCATION

---

### Frontend Simplified · Web Engineering Program · 2025

12-week intensive covering HTML, CSS, JavaScript, React, Node.js, and full-stack fundamentals — includes real-world project work and job placement support

**Clifton High School · Clifton, NJ · 2011**
