

JUSTIN HENRY

FRONTEND ENGINEER | BRAND & DIGITAL EXPERIENCE

Clifton, NJ | (201) 471-1253 | Justin.Henry0024@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

Frontend engineer and founder of Manifest, building responsive digital products and complete brand experiences across identity, websites, interaction systems, content structure, and conversion journeys. Brings a customer-focused background in operations and sales to technical work, translating business context into interfaces people can understand, trust, and use.

CORE SKILLS

FRONTEND ENGINEERING	PRODUCT & BRAND	BACKEND & TOOLS
React, Next.js, TypeScript JavaScript, HTML, CSS Tailwind, SCSS, Redux, Framer Motion	Responsive UI, accessibility Interaction and design systems Visual identity, content, conversion UX	Node.js, Prisma, PostgreSQL MongoDB, Firebase, REST APIs Stripe, GitHub, Vercel, Figma

EXPERIENCE

Founder & Frontend Engineer | Manifest | Mar 2025 - Present

[Visit Manifest](#)

- Founded an independent digital experience practice helping businesses turn fragmented brands and online touchpoints into cohesive systems across identity, responsive websites, content direction, social presence, and customer journeys.
- Built Manifest's client-facing site and service framework to connect brand strategy, frontend execution, service selection, and qualified inquiry within one polished experience.

Brand & Digital Experience Partner | Litty Co. | Active Client Engagement

[View Litty Co.](#)

- Partner across an evolving multi-brand ecosystem, creating a shared digital foundation while helping connected businesses maintain distinct identities, positioning, and customer-facing experiences.
- Engagement scope spans visual identity, responsive websites, frontend systems, reusable social content direction, and rollout planning as Litty and its sub-brands continue to develop.

Frontend Engineering Projects & Internships | Frontend Simplified / FES Institute | 2025 - 2026

- Delivered responsive features inside existing React and Next.js codebases through Skintric, Summarist, and Ultraverse work, preserving established architecture and visual direction while shipping under deadline.
- Implemented authentication, Stripe checkout, Firebase data, dynamic routing, API-driven interfaces, premium access, search, saved content, loading states, and responsive interaction patterns.

Operations, Sales & Client Leadership | JJ's Pro Service, Momentum Solar, Solar Xchange, Penske | 2014 - 2025

- Managed client relationships, sales cycles, scheduling, service delivery, and branch operations, building practical instincts for trust, objections, user behavior, and conversion-focused decision making.

SELECTED WORK

Great Wall - Interactive Product Showroom & Configurator [Live](#)

Designed and developed a live, client-approved experience for a custom media-wall business, combining structured product discovery, reusable catalog data, an interactive configurator, responsive product UX, and a context-aware estimate journey. Built through the ongoing Litty Co. engagement, with final refinements still in progress.

Juicy City - Existing-Business Brand & UX Transformation [Live](#)

Audited and redesigned the public experience for an established Jersey City business, translating its storefront energy, products, neighborhood identity, and ordering journey into a clearer responsive system. The owner accepted the direction, which is progressing toward the existing domain.

Bodywork Network - Guided Matching Platform [Live](#)

Built a provider-neutral Next.js platform that turns complex preferences and constraints into a calm guided journey through validated forms, reusable matching logic, dynamic service/provider content, accessible interactions, and lead routing.

GoCart - Multi-Role Commerce Platform [Live](#)

Built customer, seller, and admin experiences with role-aware routing, product and promotion tools, dashboards, checkout, coupons, orders, and account-specific interface states across one cohesive commerce product.

EDUCATION & CERTIFICATION

Frontend Simplified / FES Institute - Web Engineering Program and Frontend Development Bootcamp Certificate, 2025 - 2026
