

JUSTIN HENRY

Frontend Engineer · Responsive UI & Interaction Systems · React / Next.js / TypeScript

Clifton, NJ · (201) 471-1253 · justin.henry0024@gmail.com · [Portfolio] · [GitHub] · [LinkedIn]

SUMMARY

Frontend engineer specializing in translating design, brand direction, and product goals into polished, responsive, conversion-focused user experiences. Builds React, Next.js, and TypeScript interfaces with reusable frontend architecture, interaction systems, performance-minded implementation, and clear product thinking. Background in sales, operations, and branding sharpens instincts for user behavior, trust, and conversion.

SKILLS

FRONTEND	BACKEND	TOOLS
React · Next.js · TypeScript · JavaScript	Node · Prisma · MongoDB	Git · GitHub · Vercel
HTML · CSS · Tailwind · SCSS	PostgreSQL · Firebase	Figma · VS Code · Stripe
Redux · Framer Motion	REST APIs · Authentication	Postman

CURRENT EXPERIENCE

Frontend Engineer & Digital Brand Systems Lead

Mar 2025 - Present

Litty Hub - Remote, Contract

Litty Hub | Manifest | Great Wall

- Lead frontend development and digital strategy across Litty Hub's portfolio of brands and client-facing products, building responsive interfaces, reusable component systems, and scalable digital experiences.
- Founded and currently lead Manifest, a brand identity and frontend consultancy focused on translating strategy, trust, and positioning into high-conversion digital experiences.
- Currently designing and developing Great Wall, Manifest's flagship client engagement, featuring responsive layouts, interaction systems, polished UI implementation, SVG/3D experiences, a 3D model configuration estimator, and conversion-focused user journeys.
- Own frontend architecture, UI implementation, performance optimization, motion systems, accessibility considerations, and brand consistency from concept through deployment.

PROFESSIONAL FRONTEND EXPERIENCE

Skintrix - Frontend Engineering Assignment

Next.js · GSAP

- Build production-ready frontend features inside an existing Next.js architecture, converting provided designs into responsive interfaces with GSAP animation and clean implementation patterns.
- Delivered a two-week assignment in four days while preserving existing project structure, visual direction, and responsive behavior.

Summarist - Subscription Product Internship

Live · GitHub

- Owned auth, Stripe checkout, responsive UI, audio player behavior, premium gating, saved books, settings, and search inside an existing production-style Next.js codebase.

Ultraverse NFT Marketplace - Frontend Internship

Live · GitHub

- Implemented React marketplace features in an existing application, including dynamic routing, API-driven item/detail pages, loading states, creator views, and UI consistency across product surfaces.

BUSINESS BACKGROUND

Operations, Sales, and Customer-Facing Leadership

2014 - 2025

JJ's Pro Service · Momentum Solar · Solar Xchange · Penske

- Managed operations, client relationships, sales cycles, scheduling, account support, and service delivery, building practical instincts for trust, user behavior, objections, and conversion-focused UX.

PROJECTS

GoCart - Full-Stack E-Commerce Platform

Live · GitHub

Next.js · React · TypeScript · Tailwind CSS · Redux · Prisma · PostgreSQL · Stripe

- Built a multi-role marketplace with customer, seller, and admin workflows, role-aware routing, checkout, coupons, dashboards, and account-specific UI states inside one cohesive product.
- Structured dense commerce functionality into responsive storefront and dashboard interfaces that stay clear across payment, order, product, and promotion flows.

Big Boy Portfolio - Frontend Product System

Live · GitHub

React · Vite · React Router · SCSS · EmailJS · Vitest

- Built a routed portfolio product with case studies, service flows, inquiry behavior, reusable content structure, responsive layout, and recruiter/client-facing project storytelling.
- Centralized project data and page rendering logic so links, case-study routes, archive ordering, and resume project content can scale from one source of truth.

Glitter - Original Social Product

Live · GitHub

Next.js · React · TypeScript · Tailwind CSS · Prisma · MongoDB · NextAuth

- Built a branded social platform with dynamic profiles, post creation, messaging concepts, notifications, account-aware UI behavior, and consistent interaction patterns across routes.
- Expanded a tutorial foundation into a more original product direction with stronger visual hierarchy, state handling, and social UX systems.

Holy Grails React - Frontend Architecture Conversion

Live · GitHub

React · Vite · Redux · CSS

- Rebuilt a vanilla JS storefront into a scalable React component architecture with reusable UI patterns, route-aware interactions, and shared cart state managed cleanly across views.
- Preserved visual fidelity while improving maintainability, state organization, responsive behavior, and frontend structure.

Netflix Clone - Streaming UI & Interaction Systems

Live · GitHub

React · Vite · Firebase Auth · Firestore · TMDB API · SCSS

- Recreated a streaming product experience with auth gating, protected routes, cinematic autoplay behavior, content rails, player pages, and responsive interaction states.
- Coordinated TMDB data, Firebase auth, timing, masks, hover behavior, and player state to make the interface feel product-like instead of static.

EDUCATION

Frontend Simplified · Web Engineering Program · 2025

12-week intensive covering HTML, CSS, JavaScript, React, Node.js, and full-stack fundamentals, including real-world project work, job placement support, and a Frontend Development Bootcamp Certificate.

Clifton High School · Clifton, NJ · 2011
